Adding & Subtracting Game

Play It 1

You need:

0 - 9 Dice

Adding and Subtracting Game templates (see below for Game 1 or Game 2)

To play:

Pick Game Template 1 or 2

Take turns to roll the dice.

Each player places their digits to generate two 5-digit numbers. Once a digit is placed it cannot be moved.

Both players now find the answer to their calculation.

The player who calculates the highest total or largest difference wins a point.

To win:

The first player to get 10 points wins the Game.

Play again scoring for the smallest total or difference.

Subtracting Decimals Game

Play It 3

You need:

0 - 9 Dice

Subtracting Game templates (see below for Game 1, Game 2 or Game 3)

To play:

Pick Game Template 1, 2 or 3

Take turns to roll the dice.

Each player places their digits to generate two decimal numbers. Once a digit is placed it cannot be moved.

Both players now find the answer to their calculation.

The player who calculates the lowest difference wins a point.

To win:

The first player to get 10 points wins the Game.

Play again scoring for the largest difference.

Calculate using an efficient strategy:

$1.583 + 0.67 = \boxed{2.253}$

$1.583 + 0.9 = \boxed{2.483}$

$1.583 + 1.999 = \boxed{3.582}$

$2.9 + 1.673 = \boxed{4.573}$

$2.9 + 1.073 = \boxed{3.973}$

$2.999 + 1.673 = \boxed{4.672}$

$1.675 - 0.471 = \boxed{1.204}$

$1.675 - 0.9 = \boxed{0.775}$

$4.075 - 3.999 = \boxed{0.076}$

$3.452 - 0.9 = \boxed{2.552}$

$3.452 - 3.449 = \boxed{0.003}$

$3.002 - 2.998 = \boxed{0.004}$

Adding & Subtracting Decimals Game

Play It 4

You need:

0 - 9 Dice

To play:

Take turns to roll the dice three times to get three digits and complete the decimal:

0.

Each player adds 0.09 to their number.

The player with the highest total scores one point.

To win:

The first player to get 10 points wins the Game.

Play again but subtract 0.09

The player with the lowest answer scores one point.
