

EYFS Parent Workshop January 2024

EYFS parents and guardians were invited to learn more about how we teach Maths. Children and their adults completed a range of interactive activities together using common themes from our lessons such as part/part/whole and parts of 5. They were able to take the activity plans and resources they used in the session home with them afterwards. A copy of the slides for the adults who were unable to attend and for future reference are attached as PDF at the bottom of the page.
